DETAILED ACTION***Election/Restrictions***

1. Applicant's election with traverse of Group III, claims 25-28 in the reply filed on August 20, 2007 is acknowledged. The traversal is on the ground(s) that "[P]CT Rule 13.2 in Part 1b of the Annex B of the administrative instructions under the PCT specifies that 'special technical features' is defined as meaning those features that define the contribution which each of the inventions, considered as a whole, makes over the prior art. Thus, PCT Rule 13.2 is art-based and requires the citation of a publication showing the "special technical feature'. The cited publication offered in the Official Action discloses drug candidates, and does not disclose the subject matter of claims 21-23, 25-28, and 30. Therefore, absent any showing that the 'special technical feature' shared by the pending claims 21-23, 25-28, and lack of unity can properly be made. Furthermore, in applying this same legal standard with similar claims, the International Searching Authority did not determine the unity of invention as lacking. Thus, the Patent Office has the benefit of the search report, but fails to explain why a different legal conclusion was reached".

After carefully consider applicant's arguments, the examiner agrees with applicant "absent any showing that the 'special technical feature' shared by the pending claims 21-23, 25-28". However, based on the amendments filed on August 20, 2007 wherein claims 21-23, 25-28, and 30 are pending, restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Art Unit: 1634

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group A, claims 21-23 and 30, drawn to a method for the study of inter-molecular interactions under physiological or near-physiological conditions.

Group B, claim 25-28, drawn to a method for the production of a biomolecular complex.

2. The inventions listed as Groups A and B do not relate to a single general inventive concept under PCT Rule 13.1 for the following reasons:

Groups A and B do not relate to a single general inventive concept under PCT Rule 13.1. For example, the study of inter-molecular interactions under physiological or near-physiological conditions in claim 21 of Group I is not required for Group III while the production of a biomolecular complex recited in claim 25 of Group III is not required for Group I.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

3. Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO Fax Center. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993)(See 37 CAR § 1.6(d)). The CM Fax Center number is (571)273-8300.
